NordicGEO Resin Capsule Loader
Pneumatic Resin Capsule Loader

Uses:
The resin injector is used to pneumatically fire a resin capsules into vertical bolt hole and consists of a lance connected to the G1 Gun by means of a rubber or PVC mining hose.

Technical Properties:
- Designed specifically for underground use
- High grade Aluminium fabrication
- Light weight
- Barrel Lengths to suit your application (1m TO 5m)
- Barrels Diameters available: 25mm; 28mm & 32mm

NordicGEO Resin Capsule Parachutes

**Uses:**
Parachutes are recommended when NordicGEO resin capsules are air-loaded into rock bolt holes. The parachute guides and protects the capsule while it travels at high speed through the loading tube into the hole, then holds the capsule up the hole until the bolt is inserted.

**Features:**
- Made from semi-rigid LDPE
- Tapered, solid front end to protect and guide the capsule.
- Skirt with apertures to make capsule insertion easy and to hold the capsule in the parachute.
- Protruding tabs to grip the sides of the rock bolt hole and prevent the capsule from sliding back.

**Sizes:**

</tbody>
</table>

**User Instructions:**
- Make sure that you have the correct size of parachute for the resin capsule diameter.
- Gently push the resin capsule into the open end of the parachute.
- Load the capsule into the capsule gun so that the parachute is on the front end.
- Fire the capsule into the hole.
- Use one parachute for each capsule loaded.

**Nordic Geo Support range of high performance, quality capsule resins**
- Rapid setting times for fast roofing support
- Cleaner, no dust, no pumps, no loss of grout
- Easier and faster to insert
- For manual, semi-automated & fully automated bolting systems
- Available in different dimensions, lengths and setting times
